

Tex (LaTeX)

Dr. Hanan A Batarfi

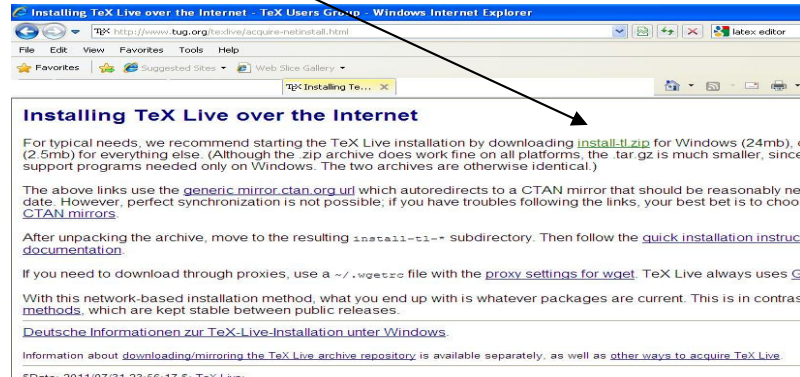

PN: Make sure that you clean-up any old version of Tex Live in your PC

لتحميل البرنامج، اذهبي للرابط

Install TexLive from <http://www.tug.org/texlive/acquire-netinstall.html>

By following the next steps: واتبعي الخطوات التالية

1) Download [install-tl.zip](#) for Windows (24mb) قومي بتحميل الملف الارشيفي الخاص بالويندوز

2) When the following screen appears عندما تظهر لك الشاشة التالية then save the file in any desired folder, say on your Desktop

Note: don't change its name

قومي بتخزين الوثيقة المضغوطة (الارشيف) في ملف باختيارك ولنفرض على سطح المكتب مع ملاحظة عدم تغيير اسم الارشيف

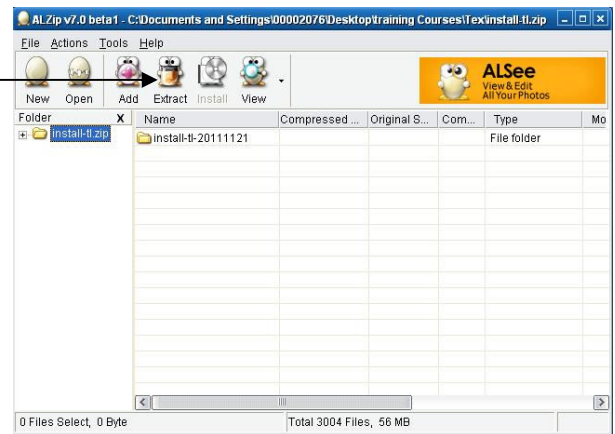

3) unpack(extract) the archive (note that you need an unzipping software to do so which can be found as a shareware in the Web)

افتحي الضغط عن الملف مع ملاحظة انك ستحتاجين الى برنامج لفك الضغط وهو متوفر على الشبكة العنكبوتية بشكل مجاني عندها سيظهر لك الملف التالي

A folder will appear

install-tl-20111121

To install a Tex software try MikTeX by downloading it from <http://www.miktex.org/> and clicking MiKTeX2.9

MiKTeX Package Rep

Scroll-down until you find the link to download "Basic MiKTeX", press download

Installing a basic MiKTeX system

To install a basic MiKTeX system, download and run the "Basic MiKTeX" installer. MiKTeX has the ability to install missing packages automatically, i.e., this installer is suitable for computers connected to the Internet.

"Basic MiKTeX 2.9" Installer

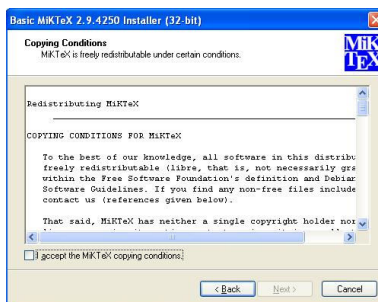

*MiKTeX 2.9 64-bit requires a 64-bit Windows system.

After the download completed, Press Run, then

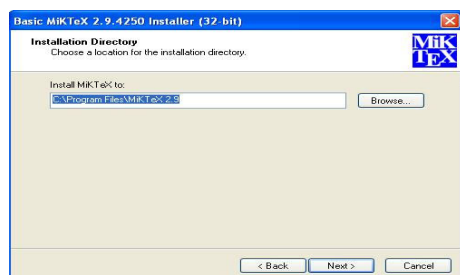

Press Run, then

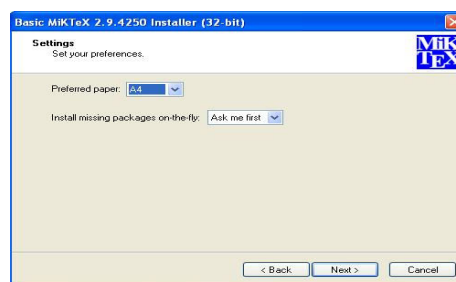

click on "I accept..." then Next

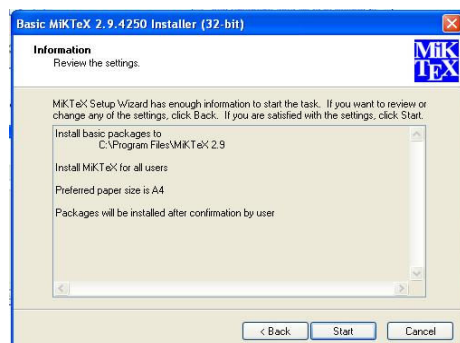

Click on "Anyone who uses this computer (all user)", then click Next

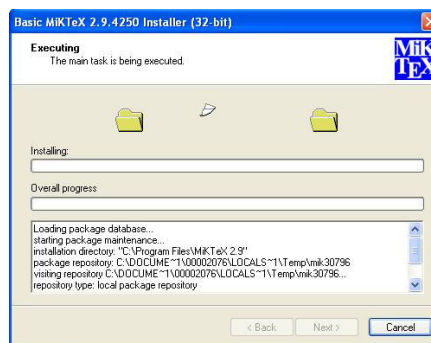

Type where do you want the program to be installed, then press Next

press Next

Press Start
You'll see the Screen

Press Next
when appeared

When installation finished then this screen will appear

Go to Start → All Programs → MikTeX 2.9 → TeXworks

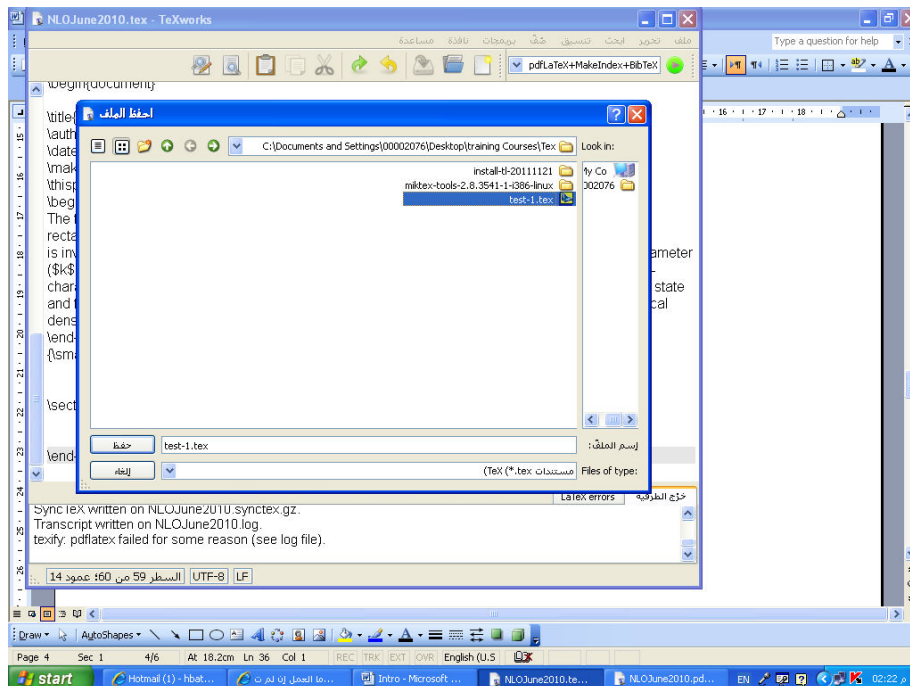

Start typing the following text then save your work.

```
\documentclass[12pt,oneside,a4paper]{article}
\usepackage{amsfonts}
\usepackage{amssymb}
\usepackage{amsmath}
\usepackage{amsbsy}
\usepackage{amscd}
\usepackage[pdflatex]{graphicx}
\setcounter{MaxMatrixCols}{10}
\renewcommand{\thesection}{\arabic{section}.}
\renewcommand{\thesubsection}{\thesection\arabic{subsection}.}
\renewcommand{\thesubsubsection}{\thesubsection\arabic{subsubsection}.}
\def\figurename{Fig.}
\makeatletter
\renewcommand{\fnum@figure}[1]{\figurename~\thefigure.}
\setlength{\abovecaptionskip}{0pt}
